

Above: Simulation of Talega-Escondido/Valley-Serrano Interconnect, Staff Alternative, as would be seen from a park on Palomar Road, just North of Wildomar's Corydon Road boundary. Road scars are not shown.

Below: Simulation of Talega-Escondido/Valley-Serrano Interconnect, Staff Alternative, as would be seen from Regency Park behind Collier Elementary. Angle shown here is chosen to include location of towers in relation to the prominent, and easily recognized, peak at the left.

Left: Simulation of Talega-Escondido/Valley-Serrano Interconnect, Staff Alternative, as would be seen 200 yards south of the city boat ramp. Road scars are not shown but they would be comparable to existing road scar just left of center.
